

**NORTHWEST FLORIDA WATER MANAGEMENT DISTRICT  
JOB OPPORTUNITY ANNOUNCEMENT  
Affirmative Action/Equal Opportunity Employer/Drug-Free Workplace**

**JOA #:** 21-19      **Position #:** 422015      **Posting Date:** 9/17/2021      **Application Deadline:** Until filled  
**Position Title:** Hydrologist I      **Starting Salary:** \$40,185 DOQ  
**Job Location:** Headquarters - Midway, FL *Located 10 miles west of Tallahassee on Hwy. 90*

**Minimum Qualifications:**

Graduation from an accredited college or university with a bachelor's degree in hydrology, geology, civil/environmental engineering, environmental science, or water resources related field. Possession of a valid Florida driver's license.

**Special Abilities:**

Working knowledge and experience in water resources and Geographic Information Systems (GIS). Excellent verbal and written communication skills. Demonstrated ability to work well under supervision and to work cooperatively with others in a team environment. Coursework and experience in hydrology, statistics, and water chemistry preferable.

**Description of Position:**

This is a professional position involving work in a wide range of water resources topics related to the review and evaluation of hydrologic and water quality data, floodplain management, stormwater management, hydrologic restoration, estuarine and riverine systems and watershed hydrology.

This is an entry level hydrologist position. Responsibilities include:

- Provide superior service to the public, other governmental agencies and District staff.
- Review, perform QA/QC, and enter hydrologic, geologic, water use, and water quality data into District databases.
- Assists with data management, presentation and reporting, data computation, and real-time information display.
- Analyzes hydrologic and climatological data to assist with water resource investigations, including but not limited to water budgets, statistical analyses, water chemistry analyses, rainfall/runoff processes, and hydrologic or hydraulic modeling.
- Performs tasks in support of stormwater management, watershed hydrology, water supply, flood control, water resources restoration, and emergency management.
- Assists in the preparation of technical assessments to support the development of minimum environmental flows and levels for rivers, lakes, aquifers, and springs.
- Performs other duties as assigned.
