Re: Progress Report 21

Dear Ms. Tauxe,

Please accept this submittal as the 21st progress report for the SHLMB. This report was written in accordance with Specific Condition 27.

Please provide a brief description of permit requirements met and extent of work completed since the previous report:

1. Fishing and hunting continued at the SHLMB throughout the fall and winter without incident in accordance with Specific Condition 8 and Attachment A of the permit.

2. In accordance with Specific Condition 8, security and law enforcement continued at the bank without any violations.

3. A total of 841 acres were burned at the SHLMB. These included 806 acres of sandhills and 35 acres of hydric pine flatwoods (Figure 1).

4. Surveys for feral hog damage continued during the summer and fall of 2014 in accordance with Specific Condition 22. Hog damage was scattered within the 168 acres of hydric pine flatwoods restoration. Due to high water levels the hogs have been moved out of the forested wetlands where they usually were observed. A total of 14 hogs were eradicated from the bank in 2014 (Figure 2).

5. A thirty seven acre sand hill restoration adjacent to the check station was treated a second time for Bahia grass cover in September of 2014 (Figures 3).

Restoration activities anticipated within the next 6 months:

1. Surveys for nuisance and exotic species will continue in the winter and spring of 2015 in accordance with specific condition 22.

2. Water Level gauges will continue to be measured in 2015 in accordance with Specific Condition 12.

	RY CLARK	JON COSTELLO	NICK PATRONIS	BO SPRING
	Chipley	Tallahassee	Panama City Beach	Port Saint Joe

3. Approximately 460 acres of sand hill and 140 acres of hydric pine flatwoods will be burned during the spring or early summer of 2015.

4. Site inspections will be conducted to determine if any further shrub reduction is needed at the SHLMB.

5. The semi-annual monitoring will be conducted in accordance with Specific Condition 28.

## Please provide a brief description of problems encountered and solutions undertaken:

Hog damage was observed within the 168 acres hydric pine flatwoods. FWC was notified and steps were taken to eradicate hogs. This will continue until hogs have been removed.

## Certification

I certify that this report represents true accurate and representative description of the activities and site conditions at the time of this report. This semi-annual report was written in accordance with Specific Condition 27, of the permit.
