

**Rogers Tract – 2006 Monitoring**  
**CORPS Permit No. 200003385 (IP-TK)**

The Northwest Florida Water Management District (NFWWMD) conducted a site visit and photo-monitoring in 2006 for mitigation associated with CORPS Permit No. 200003385 (IP-TK). To comply with Special Condition #1 of the permit, the NFWWMD purchased the 29.71-acre Rogers Tract on the Backwater River for perpetual preservation in a natural state (see map below). Signage indicating NFWWMD ownership has been posted. The site was visited on 17 November 2006 to photo-document the current status of the mitigation site (eight representative photographs are shown below). No nuisance or exotic species were noted on the mitigation site during the field visit. No dumping of trash on the mitigation land was observed. Ecologically, the site appears healthy with abundant obligate, facultative-wet, and facultative vegetation.
