

Brewer Tract – 2006 Monitoring
CORPS Permit No. 200002363 (IP-CP)

The Northwest Florida Water Management District (NFWFMD) conducted a site visit and photo-monitoring at the Brewer Tract in 2006 for mitigation associated with CORPS Permit No. 200002363 (IP-CP). Mitigation for this permit is being accomplished at two sites: the Brewer Tract on the Backwater River, and the Yellow River Ranch property. This report is for the Brewer Tract mitigation only. Monitoring reports for the Yellow River Ranch will be provided separately by a consultant (Wilson-Miller) as that project is implemented.

To fulfill, in part, conditions specified by this permit, the NFWFMD purchased the 89-acre Brewer Tract (see map below). The Brewer Tract will be preserved in perpetuity in a natural state. Signage indicating NFWFMD ownership has been posted. The site was visited on 17 November 2006 to photo-document the current status of the mitigation site (eight representative photographs are shown below). No nuisance or exotic species were noted on the mitigation site during the field visit. No dumping of trash on the mitigation land was observed. Ecologically, the site appears healthy with abundant obligate, facultative-wet, and facultative vegetation.
