

Agricultural Cost-Share Grant Program

Eligible Equipment and Practices

Conservation Tillage	Nutrient Management	Irrigation Management	Sod-Based Rotation
Cover Crops	Cover Crops	Cover Crops	Perimeter Fencing
Strip Till	Variable Rate Spreader	Nozzle Package	Pasture Grass Establishment
No-till Drill	Variable Rate Sprayer	Control Panel	Livestock Management Equipment
Crimper Roller	Granular Fertilizer Bander	Variable Rate Irrigation	Irrigation Management Equipment
Variable Rate Sprayer	Liquid Fertilizer Bander	Pump Upgrade	Nutrient Management Equipment
Seed Tender	GPS System	Diesel/Electric Conversion	Conservation Tillage Equipment
True No-till Planter	Fertigation System	Electrical Conductivity Mapping	
Row Cleaners	Nurse Tank	Weather Station	
GPS System	Precision Soil Sampling	End-gun Shut Off	
Ripper Roller	Weather Station	Variable Frequency Drives	
Other Special Projects	Bulk Storage/Handling Equipment	Remote Control Technology	
	In-row Application System	GPS System	
	Other Special Projects	Soil Moisture Sensors	
		Flow Meters	
		Automation Technology	
		Other Special Projects	

1. Prior to purchases or implementation, an application must be submitted to one of the contacts below and a contract must be executed to be eligible for reimbursement.
2. All projects listed have been previously approved within the Jackson Blue Spring BMAP area.
3. Additional program information may be found at: <https://www.nfwwater.com/Water-Resources/Agriculture>.
