*With FDOT District-3 concurrence, and where noted, mitigation was provided for non-FDOT projects.

**Direct wetland impact acreage is from either federal or state permit. Where federal and state permits indicate different direct impact acreages, the higher of the two is reported in this column. Where permits assign impact acreage to categories such as direct, temporary, secondary, shading, or other surface waters, only the direct impact acreage is used (permit formats have varied over time—it is not always possible to separate direct impacts from other impacts based on information contained within permits). Table updated 10/30/2026.
